Redesigning Caseloads to Best Support Student Success

Assign Incoming Student Placement Levels

- High or Moderate risk = Level 1 (meets every 2 weeks for intrusive academic support)
- Low risk = Level 2 (meets once per month and less intrusive)

Communicate Meeting Frequency

- Advisor handbook outlines meeting frequency and detailed objectives for each level
- Incoming students receive information during orientation and continuing students are contacted by advisor
- All scheduling done through Navigate

Assess Results:

- **7% increase in first year student persistence**
- More engaged students, advocating for their own academics based on skills developed through working with advisor

In addition to redesigning caseloads, we also...

- Transformed tutorial model
- Implemented student success teams to include peer mentor
- Created faculty mentor role
